## NOTES

### Notes

Premiums were analyzed using the second-lowest cost silver (benchmark) premium for a 40-year-old in each county and weighted by county plan selections. In some state-based marketplaces, the premium data for some years are at the rating area level and are mapped to counties before weighting by county plan selections. For more information on sources and methodology, see: [2017 Premium Changes and Insurer Participation in the Affordable Care Act's Health Insurance Marketplaces](#).
